

Overview

The Ethereum Inscription DAO is a decentralized organization that runs the Ethereum Inscription chain.

Our mission is to help existing Inscription projects return to decentralization and to help future Inscription projects return to decentralization. Taking "deploying and minting inscriptions without consuming Gas" as a solution, we will continue to develop ecological construction and eventually form a complete ecological chain, becoming people's second Ethereum solution.

If you are a [Gate.io](https://gate.io) user, you should have seen the prompt when opening the [ORDI](#) transaction page. "This currency belongs to the Inscription Track and is currently in its early stages. There is great uncertainty about its actual use and whether it will be supported by subsequent Bitcoin Core upgrades." ". Therefore, it is a trend for inscriptions to return to decentralization.

Ethereum Inscription Chain

The POW branch of Ethereum will be upgraded to POS in the future.

Network name: Ethereum Inscription Mainnet

RPC URL: <https://rpc.etins.org>

Chain ID: 1617

Currency symbol: ETINS

Token Economics

Initial supply: 1,000,000,000,000

Airdrop: 700,000,000,000 (if not enough people receive it, the remaining will be locked or ecologically constructed)

Ecological construction: 100,000,000,000 (free inscriptions, etc.)

Foundation: 100,000,000,000

Development team: 100,000,000,000

Governance

Ethereum Inscription DAO relies on the collective autonomy of ETINS holders, embodying openness and participation. Participants can initiate a preliminary proposal on the Ethereum Inscription DAO community and then make a formal proposal in the DAO's governance module. ETINS holders can freely exercise, delegate and enjoy voting rights throughout the decision-making process.
